

WriteItNow 5 in Five Minutes

Rob Walton and David Lovelock

July 9, 2016

Getting Started

You may find it useful to print this guide and keep it handy as you use the program, *WriteItNow 5*.

Introduction

WriteItNow 5 is software for writing novels. It has sections for the text of the novel (introduction, chapters, scenes, etc.) and sections for background research (notes, ideas, characters, etc.).

Additionally there are tools to make writing easier (thesaurus, word count, story board, etc.) and creativity tools (idea generator, name generator, prompts, etc.).

Anything written in *WriteItNow 5* can be exported in many formats (Microsoft® Word, PDF file, ePub, etc.).

This guide is designed to introduce a new user to a few of these features—enough to get started.

Obtaining a Copy of *WriteItNow 5*

A copy of *WriteItNow 5* can be downloaded from <http://www.ravensheadservices.com/download.php>. The demo version is free and valid indefinitely. It can do most things but it cannot save. To convert the demo version to the full version requires an unlock code, which can be purchased at <http://www.ravensheadservices.com/register.php>.

Installing *WriteItNow 5*

First Time User of *WriteItNow*

The *WriteItNow 5* installation program is called *install5.exe*. After downloading, double click on *install5.exe*, and follow the on-screen instructions.

Upgrading From *WriteItNow 4* to *WriteItNow 5*

In *WriteItNow 4* files were called ‘stories’. Each ended in ‘.wnw’. In *WriteItNow 5* files are called ‘projects’. Each ends in ‘.wnwx’. *WriteItNow 5* can open files created by *WriteItNow 4*. When it does this it converts the *WriteItNow 4* story to a *WriteItNow 5* project and saves this with the extension ‘.wnwx’.

To upgrade from *WriteItNow 4* the procedure is

1. Install *WriteItNow 5*.
2. Run *WriteItNow 5* and choose  from the Menu Panel shown in Figure 1.
3. Open a *WriteItNow 4* story.
4. The story will be opened and saved as a *WriteItNow 5* project.

So if a *WriteItNow 4* story called “The Great American Novel.wnw” is opened in *WriteItNow 5*, it will be saved as “The Great American Novel.wnwx”. *WriteItNow 5* can open *WriteItNow 4* stories but *WriteItNow 4* cannot open *WriteItNow 5* projects.

Starting *WriteItNow 5*

To start *WriteItNow 5*, click on the  icon on the Desktop. If there is no *WriteItNow 5* icon on the Desktop then, on Windows, the program is started by selecting the *Start Menu* icon,  (bottom left of screen), choosing *All Programs*, and then clicking on *WriteItNow 5*.¹ An image similar to Figure 1 is shown, except the white and blue areas will be blank.

The Main Screen

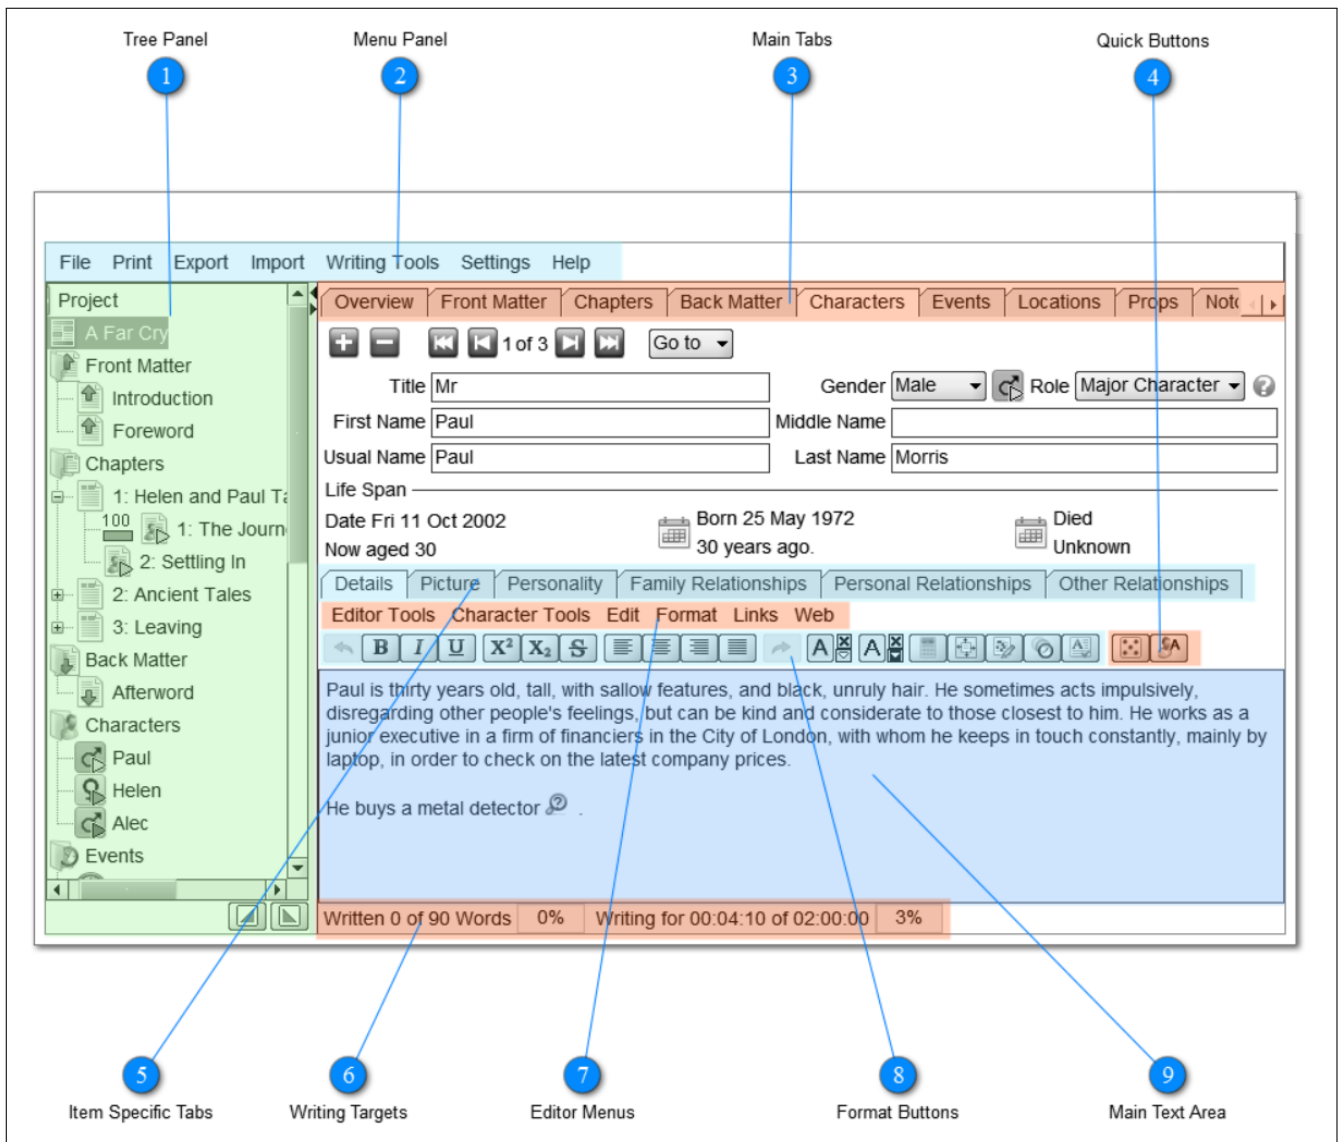

Figure 1: *WriteItNow 5* Screen Areas

Initially the more important areas in Figure 1 are ①, the Tree Panel; ②, the Menu Panel; ③, the Main Tabs; and ⑨, the Main Text Area.

To start using *WriteItNow 5*, the minimum that needs to be done is

- Create a New Project.
- Add Chapters and Scenes.
- Save the Project.

¹The Windows 8 Start Menu can be accessed by installing the free program “Classic Shell”, <http://www.classicshell.net/>.

Apart from initially creating a project, the software doesn't insist that anything be done in a fixed sequence nor that everything be used.

Creating a New Project

To start writing a user must create a new project. This is done by going to **File** > **New Project** on the Menu Panel in Figure 1. A dialog is shown asking if the user wants to save the current project. If nothing has been entered yet select *No*.

The Create New Project dialog opens. See Figure 2.

Figure 2: Create New Project dialog

Enter a name for the project, and the folder to save it in. This example uses 'The Yellow Cat' in the **Writing** folder. When finished, press the **Create** button. This creates and saves a new project called 'The Yellow Cat'. This opens the **Overview** tab in the Main Tabs seen in Figure 3.

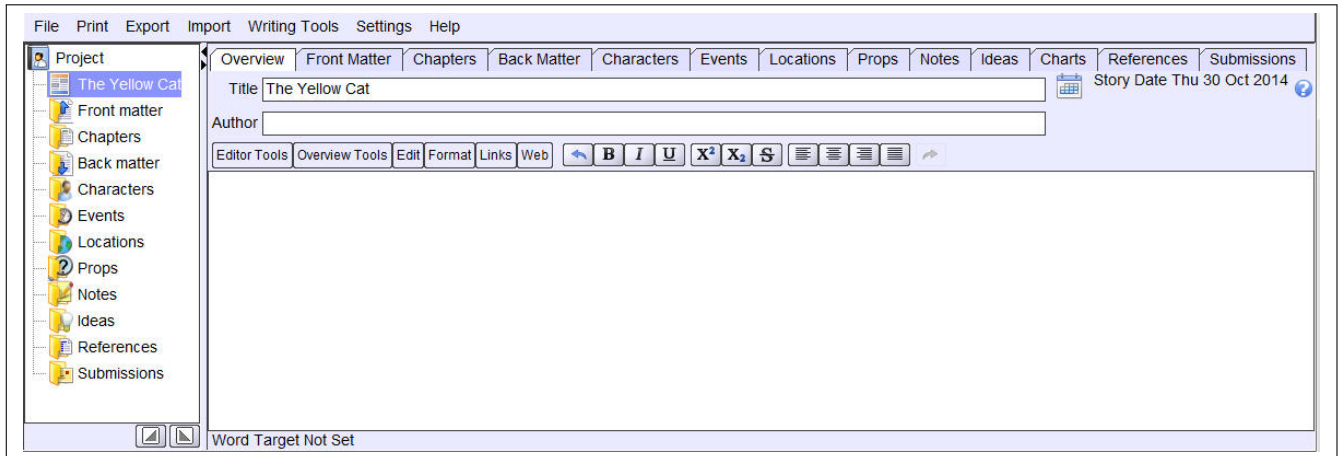

Figure 3: A blank project

This is a blank project with no characters or chapters. Once a project has been created the user is free to create items, such as characters, chapters, scenes, events, locations, notes, ideas, props, . . . , in any order.

Notice in Figure 3, that the items in the Tree Panel are essentially the same as the tabs in the Main Tabs, except that **Overview** in the Tree Panel is replaced by the title of the project, namely **The Yellow Cat**. To select

any item, the user can click either on that item in the Tree Panel or on the same item in the Main Tabs. For example, selecting the **Chapters** section on the Tree Panel opens the **Chapters** tab on the Main Tabs.

Add Chapters and Scenes

To add a chapter, click on the **Chapters** section on the Tree Panel or the **Chapters** tab on the Main Tabs. This shows Figure 4.

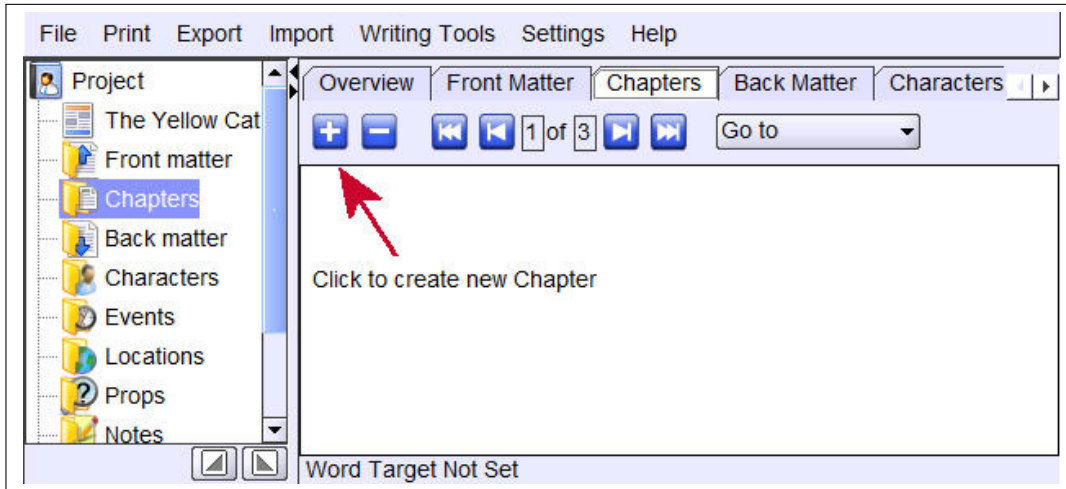

Figure 4: Adding a chapter

To create a blank chapter, click on the **+** icon in Figure 4, which shows Figure 5.

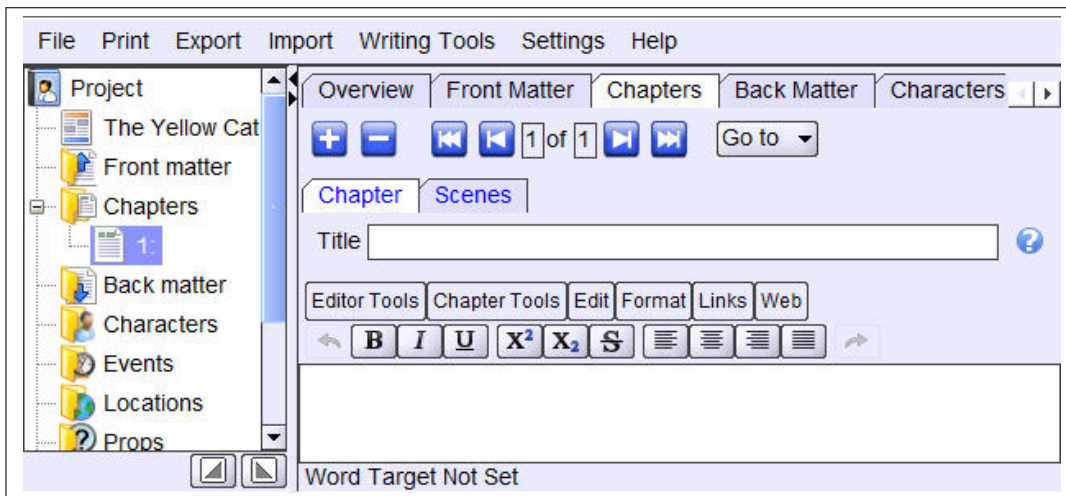

Figure 5: A blank chapter

WriteItNow 5 is flexible. The book can be written as several chapters and not use any scenes, or it can be written as several chapters each with a number of scenes. The simplest option is to write the book as several chapters each with a number of scenes and use the chapter text to write a short summary. This is shown in Figure 6. Notice that the title of the chapter, *A Break*, appears immediately in the Tree Panel. At any stage this chapter can be accessed by clicking on its Tree Panel item.

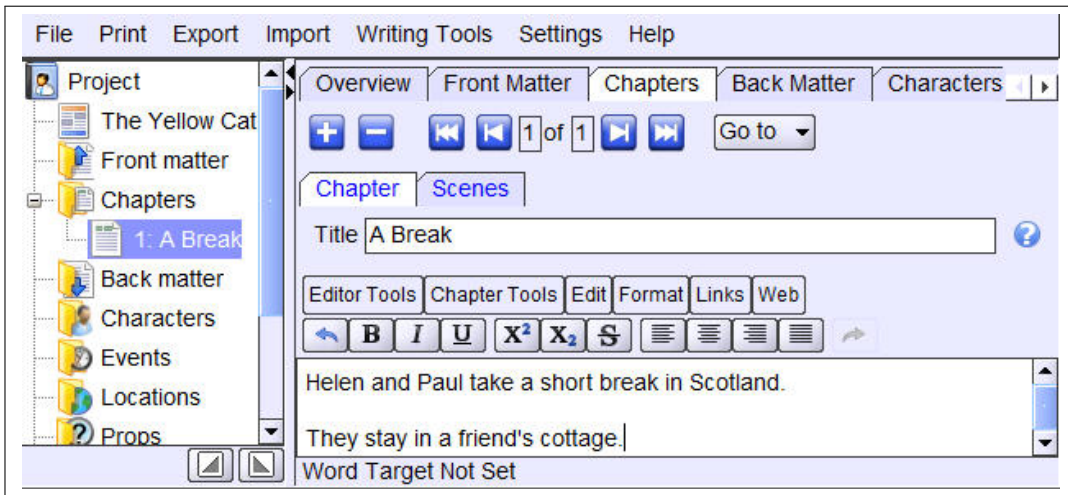

Figure 6: A chapter with a short summary

To create a scene for this chapter, click on the **Scenes** tab, which shows Figure 7.

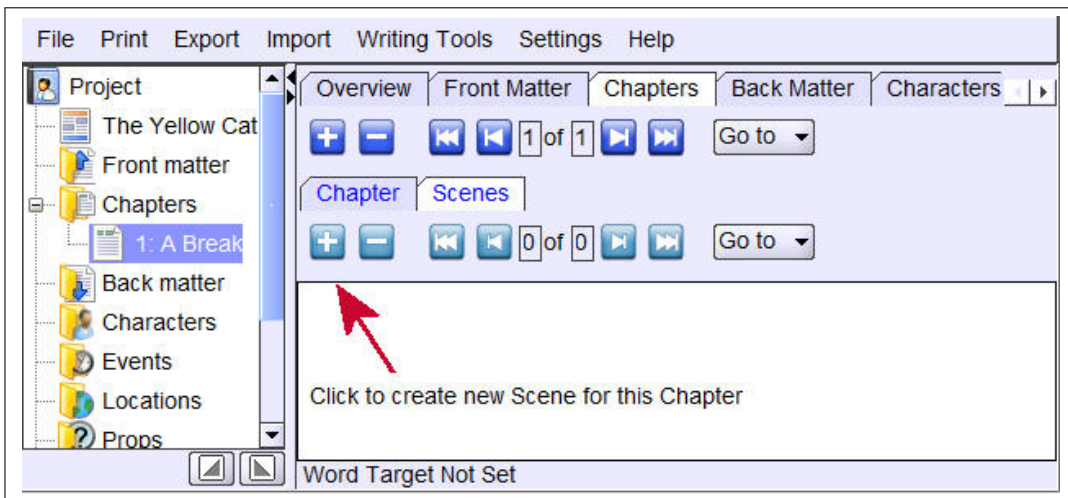

Figure 7: A blank scene

To create a blank scene, click on the **+** icon in Figure 7, which shows Figure 8.

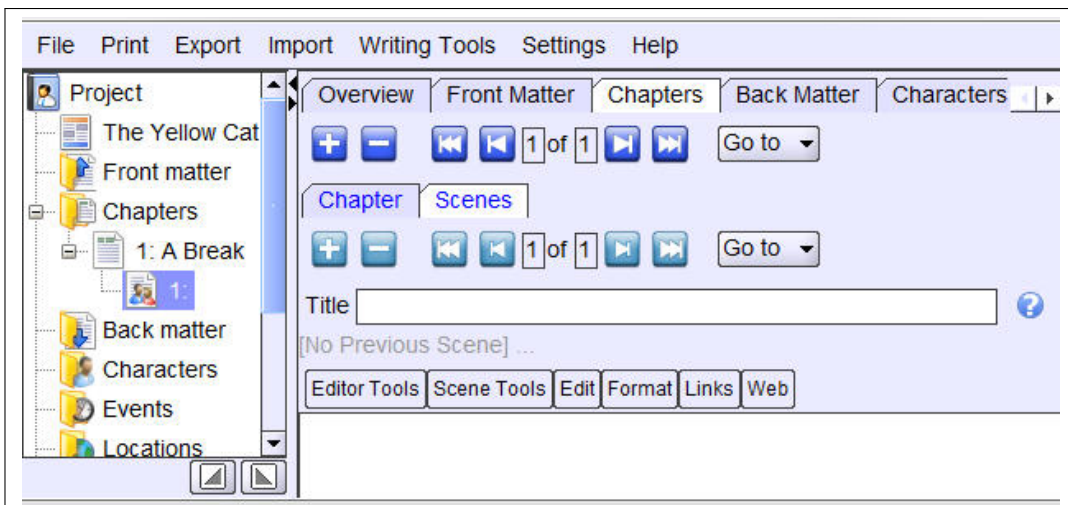

Figure 8: A blank scene

After adding a scene title, *The Journey Up*, and the scene text, Figure 9 is shown.

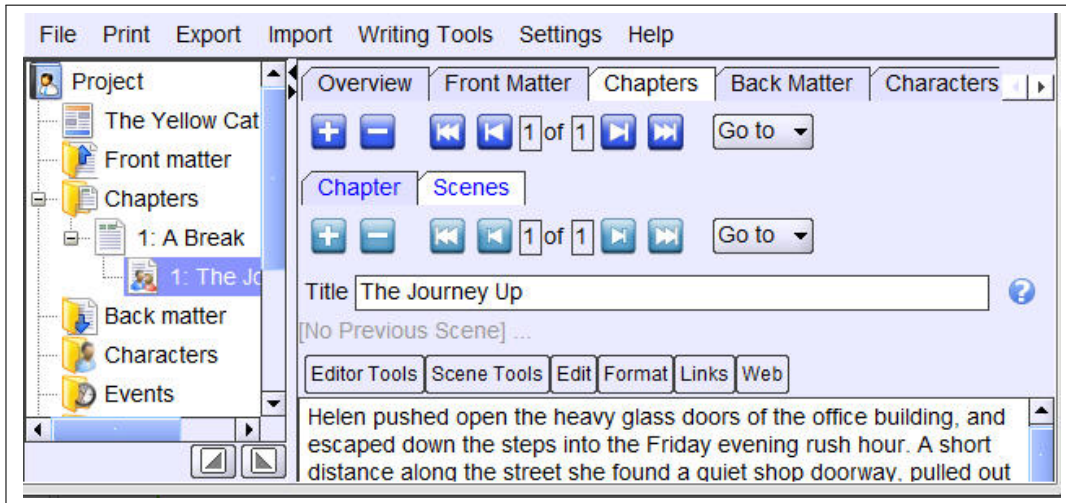

Figure 9: A scene with title and text

Notice that the title of the scene appears immediately in the Tree Panel. At any stage this scene can be accessed by clicking on its Tree Panel item.

Additional scenes can be added to this chapter by clicking on the  icon in the **Scenes** tab of Figure 9—not on the  icon in **Chapters** on the Main Tabs. See the Tree Panel in Figure 10.

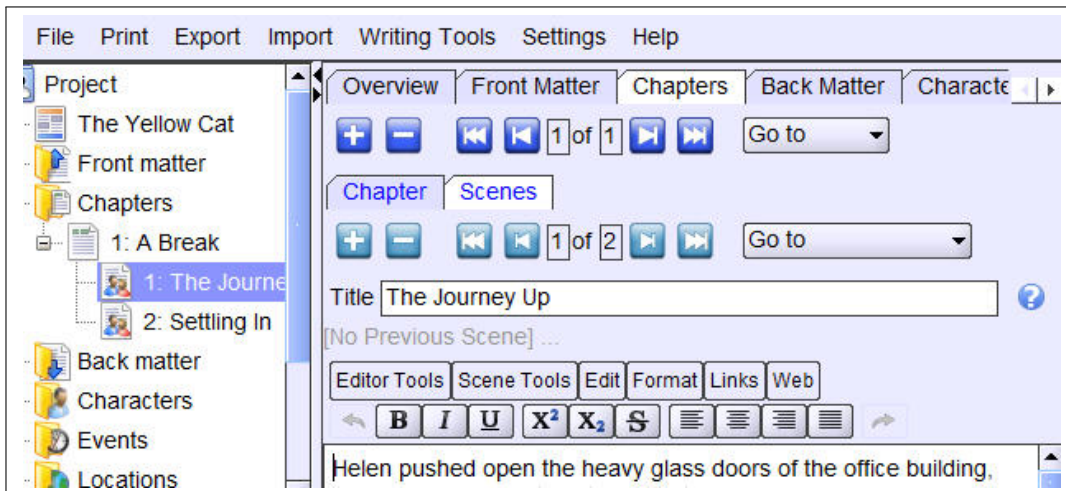

Figure 10: Chapter 1 with two scenes

Additional chapters can be added to the project by selecting the **Chapters** tab, and clicking on the  icon. See the Tree Panel in Figure 11.

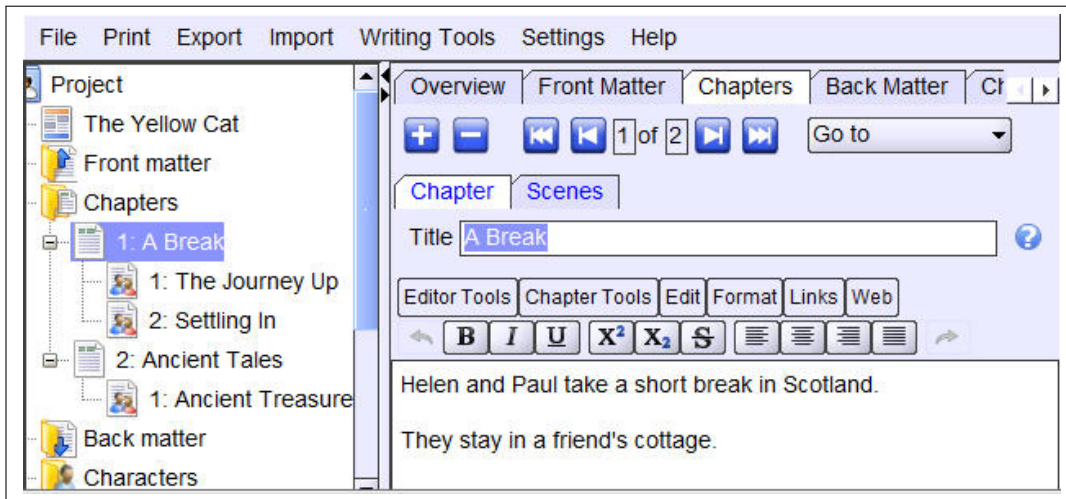

Figure 11: Two chapters. The second chapter has one scene

Save the Project

To save the project select the **File** menu from the Menu Panel and choose **Save**. This option is available only in the unlocked version of *WriteItNow 5*.

Useful Tips and Things to Know

Help

Help is obtained either by using **Help** from the Menu Panel, or by pressing the **F1** key, or by clicking the question mark icon , when available.

Deleting a Chapter or Scene

To delete the current chapter, click on the  icon. To delete the current scene, click on the  icon. **Caution.** Clicking on these icons deletes the corresponding item permanently.

Moving a Chapter or Scene

When chapters or scenes are created their titles immediately appear in the Tree Panel, as shown in Figure 11, for example. It is possible reorder these as follows.

1. Left click on the title of the chapter or scene in the tree.
2. Drag the chapter or scene to its new position.
3. If no move is possible a red cross is shown, .
4. When a move is possible the mouse cursor changes to a yellow arrow: an up arrow, , for moving before an item, and a down arrow, , for moving after an item.

There is another way to rearrange chapters and scenes, by using the Story Board. This is accessed from **Writing Tools > Story Board** on the Menu Panel, or by using the keyboard shortcut **Ctrl F5**.

Creating Characters

Characters can be created in the same way that chapters are—by selecting **Characters** from the Main Tabs and clicking on the  icon.

Renaming and Saving a Project to a Different Location

The name of the project and where it is saved can be changed by using **File >> Save As** in the Menu Panel.

Formatting Text

The Format Buttons, item **8** in Figure 1, can be used to format text in the Main Text Area.

Writing Targets

Some writers like to set targets, either by the number of words written per day, or by the time spent writing. These can be set at **Writing Tools >> Writing Targets** on the Menu Panel. Their current values are shown at the bottom of the Work Panel, as seen in item **6** in Figure 1.

UK or US English

The writer can select between the menu items being spelled in UK or US English by selecting **Settings >> Menu Text** in the Menu Panel.

To select the main dictionary—the one used by the spelling checker—go to **Settings >> Tool Settings >> Set Main Dictionary** in the Menu Panel. The choice of languages is Canadian (en_CA.dict), UK (en_GB.dict), and US (en_US.dict).

Keyboard Shortcuts

Almost every menu item can be accessed using keyboard shortcuts, which are summarized on page ??.

Exporting

Exporting is the process of converting a *WriteItNow 5* project, or part of a project, into a file formatted for use with an external program, such as Microsoft® Word or Adobe Reader®. It does not alter the project.

Story Board

Use the story board **Writing Tools >> Story Board** to get a birds-eye view of the chapters and scenes.

Storyline Editor

Use the storyline editor **Writing Tools >> Storyline Editor** to show who does what, where, and when in scenes.

Idea Generator

Use the idea generator **Ideas Tab >> Idea Tools >> Create Idea** to get some inspiration.

Family Relationships

After adding a few character family relationships, select **Characters >> Character Tools >> Update Family Relationships** to fill in gaps.

Cliches

To check for cliches use **Editor Tools >> Critiques >> Cliches** or the keyboard shortcut **Alt C**.

Understanding Projects

In *WriteItNow 5*, a project consists of two separate components: Book Text and Background Details, shown in Figure 12.

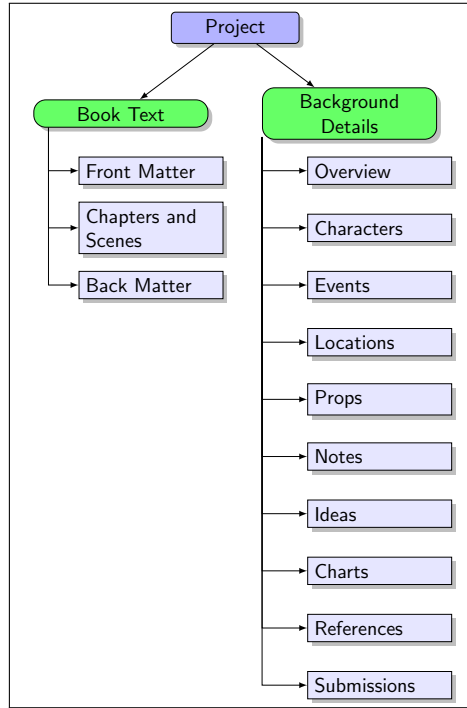

Figure 12: Project Outline

The Book Text is the material to be included in any book produced. The Background Details is where research material is kept for the book.

The tabs in the Main Tabs that are used to create the Book Text are shown in Figure 13.

Figure 13: The Book Text

The tabs in the Main Tabs that contain the Background Details are the **Overview** tab together with those shown in Figure 14.

Figure 14: The Background Details

Manuals

If you want a slightly longer introduction to *WriteItNow 5* download the 40-page “*WriteItNow 5 Essentials*” manual from <http://www.ravensheadservices.com/WIN5Essentials.pdf>. To learn all features of *WriteItNow 5*’s capabilities—including tips and advice—download a copy of the 350-page manual, *Up and Running with WriteItNow 5*, from http://www.ravensheadservices.com/up_and_running_manual.php. There is no charge for either of these. When reading these manuals, it is useful to have Figure 1 available as a reference. A larger version of that figure has been reproduced on page 10 for this purpose.

Web Tutorials

If the computer is connected to the Internet, then by selecting **Help** > **Web Tutorials** in the Menu Panel, various instructional videos on the use of *WriteItNow 5* can be viewed.
